EDUCATION

Bachelor of Engineering in Computer Science and Technology

Sep 2021 – Aug 2025

Dalian Polytechnic University – Dalian, China

GPA: 3.25 / 4.00

Relevant Coursework: Fundamentals of Cybersecurity, Operating Systems, Computer Networks, Data Structures & Algorithms, Software Engineering, Artificial Intelligence.

TECHNICAL PROJECTS

DistroKV Go, Raft Consensus Algorithm, Distributed Systems

- Developed a highly available distributed key-value store implemented in Go utilizing the Raft consensus algorithm.
- Ensured strict data consistency and fault tolerance across distributed nodes during network partitions.

KernelShield C, Go, Linux Syscalls, Network Monitoring

- Built a unified security engine designed to monitor low-level system calls and network traffic in real-time.
- Implemented custom hooks to detect anomalous behavior and potential security threats at the kernel level.

Dima Velo E-Commerce Platform React, React Router, Tailwind CSS, Local SEO

- Engineered a responsive e-commerce and retail web platform deployed to support a local bicycle business in Salé.
- Optimized application performance by refactoring routing to a modern Data Router architecture and restructuring styles with Tailwind.
- Integrated direct-to-customer channel integrations and local SEO structures to maximize visibility and user engagement.

SafeEnv (GhostVault) Python, Cross-Platform CLI, Security Automation

- Designed and deployed a cross-platform security tool focused on detecting hardcoded API keys and secrets in real-time.
- Integrated continuous scanning workflows to prevent sensitive credentials from being committed to version control.

Malware Behavior Analyzer Python, Deep Learning, TensorFlow/Keras, CNN

- Developed an innovative machine learning model to analyze and classify malware behavior using image-based methods.
- Applied CNN architectures to achieve high-accuracy classification on feature-extracted datasets.

SKILLS & TECHNOLOGIES

Languages

Python, Java, C, Go, JavaScript, TypeScript

Web & Frameworks

React, Node.js, HTML, CSS, Modern Web Development Tools, Tailwind CSS

Cybersecurity & IT

Secure Coding, Threat Modeling, Linux CLI/Admin, Syscalls, Networks

Data & AI

TensorFlow, Keras, CNN Architectures, SQLite, Jupyter Notebook

Tools & DevOps

Git, GitHub, VS Code, PyCharm, npm, pip, Virtual Environments

Spoken Languages

Arabic (Native), English (Fluent), French (Professional), Chinese (Basic)
